Presents the... *Marsdezyn*

# TREE-REX

## Mk2

### INDUSTRIAL DUTY WOOD SPLITTER

**NEW GENERATION Mk2** MARSDEN DESIGN (*Marsdezyn*) **FEATURING...**

- **THREE NEW User-Safety Categories:** Trained **Professionals**, **Casual Share**, or **Casual Hire** machines\*
- **21 Tonne of RAM THRUST** (Beware of cheats who exaggerate, quoting the splitting vector instead)
- **BIG WEDGE** 280mm REACH x 190mm WIDE for rapid split propagation—saves time as the wedge rarely has to travel more than halfway down to split a log.
- **WIDE SAFETY CLEARANCE** for any rising log rings stuck on the wedge; NEW wedge reduces hang-ups.
- **NEW LONG LIFE Construction:** 20mm thick Wedge spine-blade, Carriage plate, and Mast Track
- **450mm Ram Stroke** for tall logs
- **2-Speed Pump** gives a fast Cycle Time
- **Fast Speed for Professional Users:** Full Stroke = 5.7 seconds down, 3.6 seconds up and auto return
- **Motor Options** include manual or electric start, quality brands or low cost generic, 9.5hp or 14hp
- **OR** power the Tree-Rex off your own Tractor PTO or hydraulics, to reduce cost
- **Mounting Options** include: Trailer, Forkliftable Frame, Tractor 3-point-Linkage
- **BIG Working Table** 1580mm x 810mm; 16mm thick under and around the cutting zone
- **LOG LIFTER Mk2:** Side or Rear mount options, hydraulic powered or low cost Hook-N-Hoist strap type; all with NEW crush and overload safety features. ME can also retrofit these to some existing machines.
- **QUALITY Hydraulics** with local NZ service support. Oil continuously filtered for long life. Robust heavy steel tank resists fatigue, dissipates heat, separates entrained air for long pump life, and includes a sight glass, strainer filler, 10 micron filter with blockage indicator, drain-out and isolating valves.

\* Read our Safety Strategy Sheet together with WorkSafe's "Log Splitter Hazard" 2015 Bulletin

If you are *serious* about firewood, and safety, don't suffer a substandard log splitter any longer; order a **TREE REX** today!
